ODP # 81-924

MEMORANDUM FOR: Chief, Procurement Division
Office of Logistics, DDA

FROM :
Chief, Information Management Staff, DO

SUBJECT : Critical Request for Word Processors

25X1

1. On 12 June, Africa (AF) Division forwarded to IMS a critical request for word processors. The equipment is required to assist AF branches in the implementation of major covert action programs. These programs are the direct result of recent Presidential Findings and carry requirements for voluminous, time sensitive reporting to the White House, the Department of State, the NSC, Congress, the DCI and the DDO. Because of the need for letter perfect products, these reports are subject to frequent revisions.

2. A survey of the AF word processing requirements, see attachments A-C, indicates that 36 single station CRT word processors are justified, 16 dual disk units with printers, 14 single disk units with printers and six single disk units with shared printer options. Because of budgetary constraints and the desire to minimize the acquisition of word processors pending the establishment of an Agency Standard(s), only eight dual disk units and six single disk units with printers are being requested at this time. These need to be installed by 31 July. The remaining units will be requested when funds become available and the Agency standard has been established.

25X1

3. Attachments B & C demonstrate that through the use of word processing equipment, 16,183 work hours could be saved providing a cost avoidance of \$153,601.00 per annum over the next five years based on the use of Lanier word processors. Of the Agency TEMPEST approved word processors (CPT-8000T,

Lanier LTE-3, NBI-3000 and WANG WPS-20) considered, we propose the Lanier LTE-3 as an interim procurement until the Agency Standard word processors are available. This selection is based on current Lanier installations and Lanier's demonstrated ability to meet timely deliveries. However, equivalent equipment identified above which meets the stated minimum essential requirements, Attachment D, is considered acceptable.

25X1

4. The Division expects the following direct benefits to be derived as a result of this action:

- a. Be able to meet critical deadlines more effectively.
- b. Obtain more effective use of secretarial time.
- c. Obtain more effective use of officer time.

ADMINISTRATIVE INTERNAL USE ONLY

Attachment D

DO WORD PROCESSING REQUIREMENTS

Security Requirements:

The equipment must be TEMPEST approved or have a waiver from COMSEC for Headquarters use.

Light intensity on screen must be operator adjustable - must be able to darken screen completely.

The equipment must have a recovery program that can be used by the operator (not a vendor technician) for recovering classified information from a disc that can not be read by the system because of inadvertant damage to or fatigue of the preformatted portion of the floppy disc.

Physical Requirements - The system must have the following physical aspects:

CRT workstation and letter-quality printer require no additional furniture.

There must be a buffer between the CRT and disc - if information is deleted from the screen by accident, it will still be on the disc.

Each terminal is an intelligent terminal

Word Processing programs implemented by software.

Option of dual disc or single disc terminal. Dual disc terminals are necessary to perform recovery operations, duplicate discs, etc.

Option of two terminals sharing one printer.

Minimum of 24 lines of text displayed to the operator in addition to any status or command lines

X-Y cursor movement on screen. (HIGHLY DESIRABLE)

Status line showing margins, tabs, indents, line and character spacing, page length, and the horizontal and vertical position of cursor on a continuum during operation.

Video prompting/verification of all functions.

ADMINISTRATIVE INTERNAL USE ONLY

ADMINISTRATIVE INTERNAL USE ONLY

Colors on screen not from the blue scale, must be from the yellow-green scale. According to an Auerbach report, it has been scientifically proven that the eye can best distinguish color from the yellow-green scale.
(HIGHLY DESIRABLE)

Characters on the screen - a minimum 7x9 dot matrix character in a minimum 10X17 field.

There must a minimum of a half-character's width between characters and a half-character's height between lines of information

Capability of functioning at a temperature of 95 F with 55% humidity or equivalent through 100 F with 38% humidity.
(See)

Functional Requirements - The system must fulfill the following functional requirements:

Local Mode - Operator must be able to type directly onto paper (without interrupting the video display) to produce those items which do not need to be formatted or stored and recalled - Replaces Typewriter. (HIGHLY DESIRABLE)

SIMULTANEOUS VIDEO AND PRINTER OUTPUT FROM KEYBOARD - for formatting forms. (HIGHLY DESIRABLE)

REPEAT KEYS - All alphanumeric and punctuation keys must have auto repeat.

Dual Disc Units - The system must fulfill the following functions:

operator has the option that provides the capability of simultaneous input/output from either disc drive, i.e., edit one page or document while printing another from the same disc drive; edit or print from one disc drive while editing or printing from the other disc drive.

ability to access all functions on either disc drive

Text Editing - The system must support the following text editing functions:

ADMINISTRATIVE INTERNAL USE ONLY

ADMINISTRATIVE INTERNAL USE ONLY

automatic centering:

word, line, paragraph, block, page - (not line by line)

automatic formatting and reformatting

automatic page numbering starting with any given number

automatic pagination and repagination

automatic underscore with underscore delete which does not remove character underscored

automatic word wraparound within preset or operator-set margins

Continuous smooth horizontal cursor movement (cursor does not jump every 10 to 20 spaces)

Split cursor - (a constant cursor at top or bottom of screen which moves horizontally only - helps locate the X-Y cursor) (HIGHLY DESIRABLE)

forms fill-in with tab to next space to be filled in

must be able to amend a block of text within form

horizontal scroll which is continuous across screen to 158 characters. (250 horizontal scroll - HIGHLY DESIRABLE)

justification by line, paragraph, page

required and discretionary hyphen control

multi-level header & trailers

widow/orphan control

block text copy

insert/delete with auto word wrap/reverse word wrap:

character

word

line

block

paragraph

page

ADMINISTRATIVE INTERNAL USE ONLY

recorded tabs:
 left flush
 right flush
 decimal
 dot leader

tabs stored with document

columns:

 swap/delete each as a block, not line by line

 add column between others

 insert line in one column without manually
 readjusting the lines of other columns

highlight word, line, paragraph, page to be moved/deleted

Software Options - The system must support the following
software options:

 must be able to delete an entire page, document or disc
 with one set of commands

 document delete takes effect simultaneously on index and
 text

 alphanumeric file name appears automatically in disc
 index, appears in alphanumeric order, not in order created

 index shows number of pages of each document

 index can be rearranged - capable of filing several pages
 or documents together to form a single text or delete
 individual pages from a document within the same disc.

 orphan/widow control

 output produced in pre-determined format(s)

 Provide for optional records management facility which:

 allows for multi-line records

 has alpha/numeric sort

 can select from 7 fields on one pass

 can format and store selected material automatically

Global search, replace

Recovery program which:

can be used by operators, not vendor technicians
recovers and duplicates information

Storage & Output - The following storage and output requirements must be provided:

Print all characters on a 96-character print wheel

Available printwheels must include OCR-A

Letter-quality printer with:

10, 12 pitch and proportional spacing.
(15 pitch HIGHLY DESIRABLE)

minimum 40 cps print speed

line spacing - 1, 2, & 3. (half & quarter spacing
for forms preparation is HIGHLY DESIRABLE).

capability of multiple copies (original plus
2 copies)

must accept sheet feeder and forms tractor

Repaginate and print in background mode

Interface Requirements

OCR-A type font for cable preparation

NOTE: ALL REQUIREMENTS ARE HARD UNLESS OTHERWISE NOTED
